Green merits

The following is a list of 20 sustainable projects by the City of Ljubljana and its public companies and institutes. In our opinion, it is these that have best characterised life in Ljubljana in recent years. Due to them, life here has become not just greener, but also higher quality.

Click on the links below to find out detailed information about a specific project, our work and care for our environment.

Ljubljana wins European Green Capital Award 2016

Ljubljana has today been named European Green Capital 2016.

The announcement was made at the Award Ceremony hosted by the current European Green Capital, Copenhagen earlier today. Mayor Zoran Jankovic accepted the Award on behalf of Ljubljana from Commissioner for the Environment Janez Potočnik.

Ljubljana was shortlisted alongside – Essen, Nijmegen, Oslo and Umeå. Each city was shortlisted for the award in its own unique way and the Jury had a tough challenge in selecting an overall winner from such a high standard of applicants.

We would like to take this opportunity to congratulate all five cities and invite all unsuccessful applicants to apply again in 2017.

A press release from today's Award ceremony can be found [here](#).
